Summary

Backend engineer with 5 years of experience building Python and Node.js services. Comfortable with PostgreSQL, Redis, AWS, Docker, Kubernetes, and CI/CD.

Skills

Python, JavaScript, TypeScript, Node.js, Express, FastAPI, PostgreSQL, Redis, AWS, Docker, Kubernetes, Terraform, REST APIs, GraphQL, Git, Linux

Experience

Senior Backend Engineer | Nimbus Labs | Jan 2022 - Present

• Designed event-driven services handling 4M requests per day using Python, FastAPI, Kafka, and Redis.

• Cut p95 latency by 38% by adding PostgreSQL indexes and a read-through cache.

• Led migration of 24 services to Kubernetes on AWS with Terraform and GitHub Actions.

Backend Engineer | Riverstone Technologies | Jun 2019 - Dec 2021

• Built REST APIs in Node.js and Express for a payments product used by 120,000 customers.

• Introduced integration tests and CI checks that reduced production rollbacks by half.

Projects

JobScout - Local job discovery assistant

• Node.js service that normalizes public job feeds, deduplicates listings, and scores fit against a resume.

LogPilot - Log search and alerting tool

• Python and Elasticsearch pipeline for searching application logs with sub-second queries.

Education

B.Tech in Computer Science | National Institute of Technology, Surathkal | 2019

Certifications

• AWS Certified Solutions Architect - Associate

• Certified Kubernetes Administrator (CKA)
